

ABOUT CORONAVIRUS DISEASE (COVID-19)

WHAT IT IS

COVID-19 is an illness caused by a coronavirus.

Human coronaviruses are common and are typically associated with mild illnesses, similar to the common cold.

HOW IT IS SPREAD

Coronaviruses are most commonly SPREAD from an infected person through:

- ▶ respiratory droplets when you cough or sneeze
- ▶ close personal contact, such as touching or shaking hands
- ▶ touching something with the virus on it, then touching your eyes, nose or mouth before washing your hands

These viruses are not known to spread through ventilation systems or through water.

IF YOU HAVE SYMPTOMS

If you have SYMPTOMS of COVID-19 — fever, cough, or difficulty breathing:

- ▶ stay home (**isolate**) to avoid spreading it to others
 - if you live with others, stay in a separate room or keep a 2-metre distance
- ▶ call ahead before you visit a health care professional or call your **local public health authority**
 - tell them your symptoms and follow their instructions
- ▶ if you need immediate medical attention, call 911 and tell them your symptoms

SYMPTOMS

Symptoms may be very mild or more serious. They may take up to 14 days to appear after exposure to the virus.

FEVER

COUGH

DIFFICULTY BREATHING

PREVENTION

The best way to prevent the spread of infections is to:

- ▶ practice **physical distancing** at all times
- ▶ stay home if you are sick to avoid spreading illness to others
- ▶ wash your hands often with soap and water for at least 20 seconds
- ▶ avoid touching your eyes, nose or mouth, especially with unwashed hands
- ▶ avoid close contact with people who are sick
- ▶ when coughing or sneezing:
 - cover your mouth and nose with your arm or tissues to reduce the spread of germs
 - immediately dispose of any tissues you have used into the garbage as soon as possible and wash your hands afterwards
- ▶ clean and disinfect frequently touched objects and surfaces, such as toys, electronic devices and doorknobs
- ▶ wear a **non-medical mask or face covering** (i.e. **constructed** to completely cover the nose and mouth without gaping, and secured to the head by ties or ear loops) to protect the people and surfaces around you

KNOW THE FACTS

ABOUT CORONAVIRUS DISEASE (COVID-19)

COVID-19 is an illness caused by a coronavirus. Human coronaviruses are common and are typically associated with mild illnesses, similar to the common cold.

Symptoms of human coronaviruses may be very mild or more serious, such as:

FEVER

COUGH

DIFFICULTY BREATHING

Symptoms may take up to 14 days to appear after exposure to the virus.

Coronaviruses are most commonly spread from an infected person through:

- ▶ respiratory droplets when you cough or sneeze
- ▶ close personal contact, such as touching or shaking hands
- ▶ touching something with the virus on it, then touching your eyes, nose or mouth before washing your hands

These viruses are not known to spread through ventilation systems or through water.

The best way to prevent the spread of infections is to:

- ▶ wash your hands often with soap and water for at least 20 seconds;
- ▶ avoid touching your eyes, nose or mouth, especially with unwashed hands;
- ▶ avoid close contact with people who are sick;
- ▶ cough and sneeze into your sleeve and not your hands;
- ▶ practice **physical distancing** at all times;
- ▶ stay home if you are sick to avoid spreading illness to others;
- ▶ wear a **non-medical mask or face covering** (i.e. **constructed** to completely cover the nose and mouth without gaping, and secured to the head by ties or ear loops) to protect the people and surfaces around you.

Note: The Government of Canada has implemented an Emergency Order under the *Quarantine Act*. This order means that everyone who is entering Canada by air, sea or land has to stay home for 14 days in order to limit the spread of COVID-19. The 14-day period begins on the day you enter Canada.

- If you have travelled and have no symptoms, you must **quarantine** (self-isolate).
- If you have travelled and have symptoms, you must **isolate**.
